The Beauty of Real Wood Cabinetry

Natural wood, such as the maple we use, is a strong fine-grained wood that is mainly off-white in color. It may contain light hues of yellow-brown or pink and also contain natural "imperfections" which add character and uniqueness to the wood that will enhance the beauty and overall look of your cabinets.

The Finest of Furniture Finishes

Our solid wood cabinet finishes are processed through the following steps which include their craftsmanship details:

1. The finest solid maple wood is sanded until smooth and vacuumed.

2. An equalizer stain is applied to balance the base color of the wood.

3. A toner is applied to establish color uniformity.

4. A deep penetrating stain is applied to reveal the hidden beauty of the natural grain.

5. All stained surfaces are hand-rubbed and wiped of excess stain and then slowly air-dried.

6. A wood sealer is applied, penetrating all exposed wood surfaces for uniform protection.

7. All surfaces are hand-sanded, providing a smooth, consistent surface.

8. A glaze is applied by hand (if applicable).

9. A color consistency examination is performed with additional touch-up if needed.

10. A final protective top coat is applied, maximizing resistance to scuffing, moisture, fading and most household chemicals.

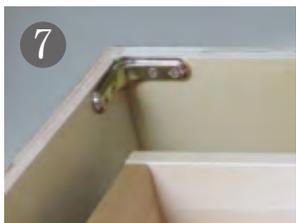

Standard Features

All BRG Cabinets and Vanities are constructed with 100% solid wood and proudly come with the following **STANDARD** features:

1. Door Panel: 3/4"-thick solid wood; full overlay door.
2. Door Hinge: Door Hinges: 6-way adjustable; soft-close metal; hidden Euro-style.
3. Adjustable Shelf: Adjustable Shelf: 5/8"-thick cabinet-grade plywood; clear coat finish on all sides and edges; with metal shelf rests.
4. Drawer: Drawer: 1/2"-thick solid wood on all sides; full extension pull-out; dovetail construction.
5. Drawer Glide: Drawer Glide: full extension pull-out; soft-close metal; concealed under-mount.
6. Plywood Box: 1/2" to 5/8"-thick cabinet-grade plywood; clear coat finish on interior sides; matching color finish on exterior sides.
7. Metal Bracket: corner bracket reinforcements in base cabinets for maximum stability.
8. Door Bumper: promote quiet-closing and reduce slamming for maximum durability.

Superior Construction

Cabinetry Accolades & Certificates

We are Proud to have earned the coveted Kitchen Cabinet Manufacturers Association (KCMA) Certification. Cabinets that comply with the nationally recognized KCMA/ANSI 161.1 Standard and bear the KCMA certification seal have successfully completed a rigorous battery of tests simulating years of typical household use. KCMA's rigorous, in-laboratory compliance program measures the integrity of cabinetry through five tests.

These tests evaluate cabinet structure, door and drawer operation, and the cabinetry finish, making certain each feature complies with the nationally recognized standards developed by KCMA. In today's competitive homebuilding industry, our KCMA cabinetry standards are well respected and serve as a best-in-class benchmark for cabinet manufacturers.

We are Proud to be Certified CARB2 Compliant. CARB2 is a certification process instituted by the California Air Resources Board (CARB) to reduce formaldehyde emissions and protect the public from airborne toxic contaminants. The CARB2 compliant seal indicates that the product's formaldehyde levels are well within the safety limits.

Sustainability is at the heart of everything we do at our J&K Cabinetry Factories and that's why we use AkzoNobel, the leading manufacturer of Eco-Friendly and Sustainable Architectural Paints, Coatings & Stains. It's vital for the future success of our company, our society and our planet.

Member

We are an active member of the National Kitchen & Bath Association (NKBA). NKBA is a non-profit trade association that promotes professionalism of the kitchen and bath industry.

The mission of the NKBA is to create the Industry Best Practices in an effort to provide uniform standards where everyone enjoys safe, beautiful and functional kitchen and bath spaces.
